Biography

As a mathematician I think in a structured way, solving problems by logically unravelling the obstructions. As a Data scientist I developed a broad range of practical skills, expanding my creativity and communicative effectiveness. By volunteering, following extra-curricular courses, and working at socially-aware companies, I try to stay socially and environmentally conscious. Generally, I am positive, independent, ambitious, resourceful, a quick learner and an efficient communicator. My strongest asset is my communicative skills with both technical and non-technical stakeholders.
